LETTER OF RECOMMENDATION

Regarding: Garno Tech — Multi-location website and booking integration

To whom it may concern,

With several locations and slightly different service menus, we needed a website that patients could navigate without confusion. Our previous site mixed location details, service information, and booking links in ways that often led to calls to the wrong branch.

Garno Tech reorganized the website around location and service selection, connected the existing booking provider, and ensured the important information remained easy to find on smaller screens. They did not attempt to replace our scheduling system, which would have added complexity without solving the immediate problem.

The project included a number of stakeholders and content approvals. Communication was consistent, outstanding decisions were documented, and we knew what was needed from our side at each stage. The resulting website is simpler for visitors and easier for our administrators to maintain.

Kind regards,

Head of Operations
Bluefern Wellness Group
